

Hi,

Designing and producing custom products may appear to be a time-consuming and costly procedure. Still, it might be as simple and affordable as a phone call.

We have created a Site furnishings Design package that includes:

- Initial discussion Free of charge consulting time.
- 2D CAD concept drawings with 2 revisions
- SketchUp 3D model with 2 revisions
- Feasibility and Prototyping costs
- Budgetary quote for additional pieces for future expectations.

Cost: \$1,495.00 (Waived if prototype pieces are developed) This cost is based on a single product.

Initial information we require to move forward:

- Please provide a general description of your project and other necessary information.
- Do you have a basic sketch of your concept?
- How many initial pieces would you like the budgetary quote to be based on, or do you have a budget to work within that will determine the quantity you order?
- Is this a one-off order, or would you like the ability to reorder this product after the initial order?
- When do you anticipate having this manufactured?

Ready to go to the next step. Give us a call or reply to this email.

Sincerely,

Banes S. Lal
