HOW TO REQUEST A QUOTE AND SUPPORT INFORMATION.

07

At Sanderson Concrete, we've been shaping communities and homes with durable, high-quality precast stairs for decades. Our stairs are designed to bring together strength, safety, and timeless style—whether it's a welcoming front step for a home or a large-scale stair system for a public space.

We work with homeowners, contractors, architects, and municipalities to deliver products that meet both aesthetic and technical needs. Every stair is built to last, meeting industry standards for safety and performance, while offering design flexibility through finishes, textures, and custom options.

RESIDENTIAL STAIRS

Our residential concrete stairs are designed to combine safety, durability, and timeless style. Whether you're upgrading a front entrance, building a backyard feature, or adding a custom touch to your home, our precast solutions deliver both beauty and function.

With multiple textures, finishes, and custom designs, we help homeowners create welcoming spaces that last for decades.

Classic Entry Steps

Traditional designs built with lasting strength, perfect for front porches and garden pathways.

\$340

Curved & Custom Steps

Elegant radius and custom-shaped stairs that bring a unique architectural element to your home.

\$420

MODERN FLOATING STAIRS

A sleek precast concrete stair system with a floating look, designed for modern interiors and exteriors. Combining architectural elegance with durable construction, these stairs deliver both safety and style for residential and commercial spaces.

OUTDOOR ENTRANCE STAIRS

Durable precast concrete stairs designed for front entrances, combining strength, safety, and timeless style. Built to withstand Canadian weather, these stairs are reinforced for long-lasting performance and can be customized with railings, textures, and finishes to match any home exterior.

PUBLIC & COMMERCIAL STAIRS

04

Our public and commercial stairs are engineered for heavy use, combining durability with modern design. Built to meet safety standards and withstand high traffic, these precast solutions are ideal for institutions, transit stations, parks, and civic buildings.

With a variety of finishes and customization options, our stairs are designed to integrate seamlessly into any architectural or urban environment.

Institutional Stairs

Reinforced concrete stairs built for schools, libraries, and government buildings, ensuring long-term safety and accessibility.

Transit & Commercial Stairs

High-traffic stair systems designed for plazas, transit stations, and commercial spaces, combining strength with functional design.

LARGE COMMERCIAL STAIRS

Precast concrete stairs engineered for high-traffic public and commercial spaces. Designed to meet safety and accessibility standards, these stairs offer long-lasting durability and a clean, modern appearance—perfect for office buildings, plazas, and civic projects.

STANDARD CONCRETE STAIRCASE

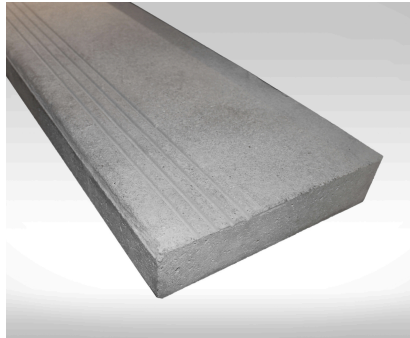

A practical and durable precast concrete stair solution, ideal for residential and light commercial applications. Built to withstand daily use and outdoor conditions, these stairs ensure safety, strength, and long-lasting performance, with optional railings and finish choices available.

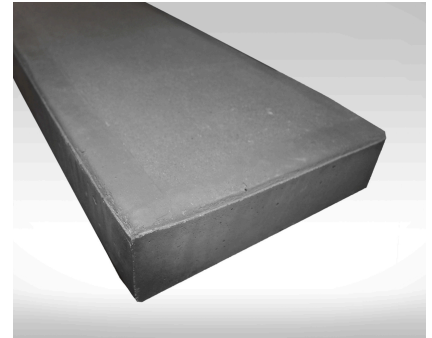

EXPOSED AGGREGATE

A classic finish that reveals the natural beauty of stone. Durable, slip-resistant, and ideal for outdoor stairs where both style and safety matter.

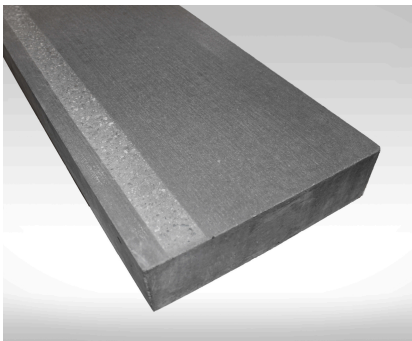

Sandblast Tactile Trowel

A smooth yet textured surface achieved through sandblasting. Provides a refined look while enhancing grip for high-traffic areas.

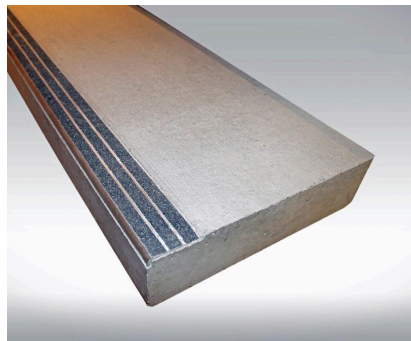

SPECIALTY FINISHES

Custom options to meet unique project needs, including color pigments, decorative textures, and architectural detailing for a tailored design.

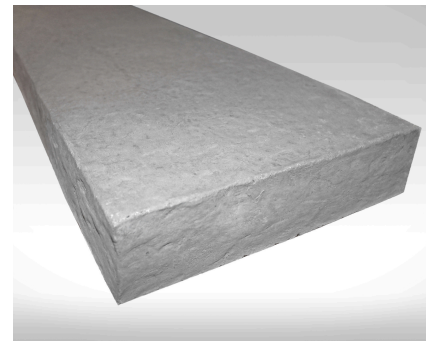

BROOM FINISH - ALL

A traditional, slip-resistant surface created with a broom texture. Ideal for outdoor stairs where safety and durability are key.

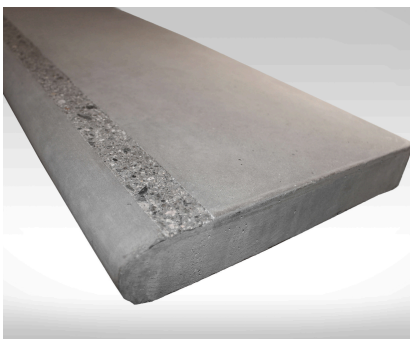

BROOM FINISH WITH EDGE TROWEL

Combines the traction of a broom finish with clean, defined edges for a polished look that works well in both residential and public spaces.

Stone Textured

A natural stone-like appearance that blends durability with aesthetics, perfect for architectural projects or landscape integration.

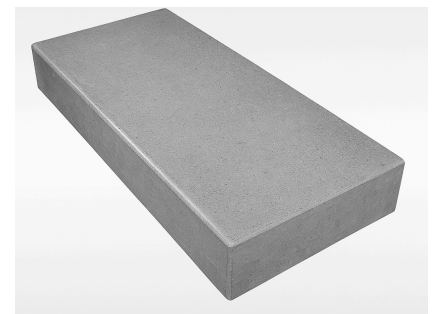

TROWELED NOSING

A smooth, hand-troweled edge finish that adds both safety and style. Designed for high-traffic stairs, this nosing provides a clean profile with improved durability.

CURVED STEP

A modern precast design with a soft curve that enhances interior spaces. Perfect for custom projects where aesthetics meet functionality.

FLAT STEP

A sleek, minimalist stair option for interiors. Its refined surface and precise edges make it ideal for contemporary residential or commercial designs.
